Innova Cab Rentals: Bugs & Fixes

Oct 19, 2026 · @rahul

Summary

15 bugs found in the latest rounds were fixed and verified on localhost; no code errors remain. The production build passes (64 pages), all 55 site pages return HTTP 200, and fares now always rise Ertiga → Innova → Innova Crysta → Innova Hycross.

The phone-view crawl covered all 54 pages at 375 px and found no error screens, no sideways scrolling and no misplaced Flight tracking badge.

Bugs fixed

Newest first. Every fix was checked on localhost (http://localhost:3000).

#	Bug	Where	Cause	Fix	How verified
1	Flight tracking badge shown on tour/outstation route pages (e.g. Bangalore → Gokarna)	Route pages hero	Badge was hard-coded for every route	Shown only on the airport route; other routes show "Open 24/7" instead	Crawl of all 34 route pages at 375 px
2	Flight tracking badge shown when Outstation or Local & Hourly tab selected	Homepage hero	Badge list was fixed, not tab-aware	Badge list now follows the selected tab	Browser test, all 3 tabs
3	"Bangalore" in the hero heading had a blue box behind it on laptops	Homepage hero	Desktop-only background colour on the word	Removed; plain light-blue text on all screens	Checked at 1366 px
4	Car prices not guaranteed to follow display order after deployment	Admin → Pricing, fare results	Admin could save any price; results order came from the database	Admin save is blocked if a car's rate is below the cheaper car or above the costlier car; results always sorted Ertiga → Innova → Crysta → Hycross	Unit test of the admin check (4 cases) + fare tests

#	Bug	Where	Cause	Fix	How verified
5	Airport fare was the same for any distance	Fare calculation	Default airport tariff was a flat fare	Base fare covers the first 40 km, then each car's per-km rate	Indiranagar 33 km vs Electronic City 51.5 km
6	Crysta and Hycross had the same driver allowance	Default rates	Equal default values	Hycross allowance ₹550 (Ertiga ₹400, Innova ₹450, Crysta ₹500)	Fare tests
7	"Full day" / "Extended" wording came back	Local Rides title and text, package tab, package labels, contact form, Crysta page	Another editor changed earlier fixes back	All packages are "8 Hours" and "12 Hours" site-wide	Text search of the codebase + crawl
8	Homepage and pages failing with 500 "Cannot find module './8948.js'"	Dev server	An IDE ran a production build into the same .next folder as the dev server	Dev server now builds into .next-dev; production builds keep .next	All 55 pages return 200
9	Cars listed in different orders on different pages	Results, fleet, menus, footer, forms	Order came from the data source or hard-coded lists	Order fixed at the source and in every hard-coded list	Crawl + fare API order
10	Duplicate "New to us? / New here?" lines and a doubled heading	Sign in / Sign up pages	Page and panel each had their own switch line	One switch line; neutral page heading	Page text check
11	Sign-in pages showed only an "unavailable" note	Sign in / Sign up pages	Panel hid itself when Firebase keys are missing	Full design always shows; actions explain sign-in is unavailable	Browser test
12	Hero subheading overlapped the car on phones	Homepage hero	Picture sat behind the text	Picture placed after the text	Measured at 375 px
13	Car names overlapping in Local Rental Packages	Local Rides page	Four names squeezed into one bar	Wrapping chips, 2 per row on phones	Browser test
14	Location list hidden behind the date row	Booking form	Stacking order of the form sections	Location fields raised above the date row	Browser test
15	"BLR Airport" cut off in the airport tile	Booking form	T1/T2 toggle too wide on phones	Compact tile; text shows in full	Measured at 375 px

Test results

All automated checks passed; the only open gap is the partial desktop crawl.

Check	Scope	Result
Type-check (`tsc`)	Whole project	Pass, 0 errors
Production build (`next build`)	64 pages	Pass, no errors or warnings
HTTP status	55 pages from the sitemap + sign-in, sign-up, terms, profile, admin login, booking confirmed	All 200; unknown URL correctly 404
Phone crawl (375 px)	All 54 pages	No error screens, no sideways scroll, one H1 per page, no Flight tracking outside airport pages
Desktop crawl (1440 px)	2 of 54 pages	Pass on the 2 checked; stopped by request
Fare order	Airport, local, outstation	Always Ertiga < Innova < Crysta < Hycross
Admin price check	4 cases	Valid change allowed; 3 out-of-order changes blocked with a clear message

One crawl alert was a false alarm: desktop-only hero pictures report as "not loaded" on phones because they are hidden there. The files are served correctly (HTTP 200).

Fare results with the default prices (₹, before tolls and parking):

Trip	Ertiga	Innova	Innova Crysta	Innova Hycross
Airport → Indiranagar (33 km)	1,600	2,000	2,500	3,000
Airport → Electronic City (51.5 km)	1,768	2,192	2,728	3,276
Airport round trip, Electronic City	3,536	4,384	5,456	6,552
Local 12 hours / 120 km	3,400	3,900	4,600	5,500
Outstation Nandi Hills, 1 day	4,300	5,250	6,200	7,450
Outstation Coorg, 2 days	8,600	10,500	12,400	14,900

Trip	Ertiga	Innova	Innova Crysta	Innova Hycross
Outstation Ooty, 3 days	12,900	15,750	18,600	22,350
